

TROPICAL CYCLONE BULLETIN NR. 21
Severe Tropical Storm AGHON (EWINIAR)

Issued at 8:00 PM, 26 May 2024

Valid for broadcast until the next bulletin at 11:00 PM today.

"AGHON" SLIGHTLY INTENSIFIED AND MADE LANDFALL OVER PATNUNGAN, QUEZON

Location of Center (7:00 PM)		
The center of Severe Tropical Storm AGHON was estimated based on all available data including those from Baler, Tagaytay and Daet Doppler Weather Radars in the vicinity of Patnanungan, Quezon (14.8°N, 122.2°E)		
Intensity		
Maximum sustained winds of 100 km/h near the center, gustiness of up to 150 km/h , and central pressure of 990 hPa		
Present Movement		
Northeastward Slowly		
Extent of Tropical Cyclone Winds		
Strong to storm-force winds extend outwards up to 200 km from the center		

TRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)

TROPICAL CYCLONE BULLETIN NR. 21

Severe Tropical Storm AGHON (EWINIAR)

Issued at 8:00 PM, 26 May 2024

Valid for broadcast until the next bulletin at 11:00 PM today.

HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Forecast accumulated rainfall: Tonight to tomorrow evening

- **> 200 mm:** Quezon
- **100-200 mm:** Aurora, the eastern portion of Bulacan, Rizal, Laguna, Metro Manila, and Camarines Norte
- **50-100 mm:** The eastern portion of Isabela, Nueva Ecija, the rest of Bulacan, the eastern portion of Pampanga, Cavite, Batangas, Oriental Mindoro, Occidental Mindoro, Romblon, Burias Island, the western portion of Camarines Sur, Cuyo Islands, Aklan, and Antique.

Forecast rainfall are generally higher in elevated or mountainous areas. Under these conditions, **flooding and rain-induced landslides are likely** especially in areas that are highly or very highly susceptible to these hazards as identified in hazard maps and in localities that experienced considerable amounts of rainfall for the past several days

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Moderate to significant** impacts from storm-force winds are possible within any of the areas where Wind Signal No. 3 is hoisted.
- **Minor to moderate impacts** from strong winds are possible within any of the localities where Wind Signal No. 2 is hoisted.
- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

Coastal Inundation

Within the next 24 hours, there is a **minimal to moderate risk of storm surge** over the exposed and low-lying coastal areas of Cagayan, Isabela, Central Luzon, Metro Manila, CALABARZON, Mindoro Provinces, Marinduque, Romblon, Camarines Norte, Camarines Sur, and Burias Island. For more information, refer to Storm Surge Warning No. 2 issued at 2:00 PM today.

TROPICAL CYCLONE BULLETIN NR. 21

Severe Tropical Storm AGHON (EWINIAR)

Issued at 8:00 PM, 26 May 2024

Valid for broadcast until the next bulletin at 11:00 PM today.

HAZARDS AFFECTING COASTAL WATERS

- Under the influence of AGHON, a Gale Warning is hoisted over the coastal waters of Aurora, Quezon, and Marinduque, and the southern coastal waters of Batangas, and the northern coastal waters of Camarines Norte. **Sea travel is risky for small seacrafts, including all motorbancas of any type of tonnage.** For more information, refer to **Gale Warning No. 3** issued at 5:00 PM today.
- Outside the Gale Warning areas, AGHON will bring moderate to rough seas (1.5 to 3.5 m) over the coastal waters along the northern and eastern seabards of Luzon and the seaboard of Bicol Region. **Mariners of motor bancas and similarly-sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigating in these conditions, especially if inexperienced or operating ill-equipped vessels.**

TRACK AND INTENSITY OUTLOOK

- AGHON will continue to move northeastward towards the Philippine Sea. The possibility of intensifying into a typhoon while over the next 12 hours is not ruled out.
- From tomorrow through the remainder of the forecast period, AGHON will gradually accelerate northeastward while intensifying. AGHON is forecast to reach Typhoon category by tomorrow afternoon and may exit the PAR region on Wednesday.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 PM today.
